Getting data from the 2016-2020 5-year ACS

```
# 2020 Census 18+ Denominator
dc2020 <- get_decennial(
  geography = "tract",
  variables = c("P3_001N"),
  year = 2020,
  state = "MN",
  county = "Hennepin",
  geometry = F) %>%
  mutate(GEOID = is.numeric(GEOID)) %>%
  rename(total_pop = value) %>%
  select(-GEOID)
```

Getting data from the 2020 decennial Census

Using the PL 94-171 Redistricting Data summary file

Note: 2020 decennial Census data use differential privacy, a technique that
introduces errors into data to preserve respondent confidentiality.
i Small counts should be interpreted with caution.
i See https://www.census.gov/library/fact-sheets/2021/protecting-the-confidentiality-of-the-2020-cens
